DIALUX

rubber & diamond cloth wheels

This kind of tool (wheel) is applied from the **finishing phase to the polishing one**. The item has been in our catalogue for 10 years and it has represented the **maximum expression in terms of great end result of the work with respect to the price**. The creation of the new semirigid polishing wheel called **TRUELIFE®** has fixed new **quality/price/ life** parameters; in this sense **TRUELIFE®** wheel can be considered as a worthy successor of **DIALUX®** wheel, thanks to its incredible performances!

Doubtless, **DIALUX®** wheel's peculiar characteristics (flexibility, softness) explain the reason why it is still a product widely used by the operators.

Its most important characteristics are:

- ▶ Diamond cloth fixed on a **rubber body**
- ▶ **Perfect polishing** of the profile
- ▶ **Excellent quality/price ratio**
